

More than 1900 employees in 25 European laboratories serve society with independent analysis for healthy food, clean environment and sustainable agriculture. Our IT department maintains and develops the in-house database for mapping all testing and billing processes. To ensure that AGROLAB continues to stand for perfect service, we are looking for additional employees with commitment, personal responsibility and a passion for precision.

To strengthen our central development and IT department we are looking for

INFORMATION PROCESSOR or SPECIALIST (f/m/d) for application development

at the AGROLAB GmbH site in Landshut (Munich area, train connection)

HERE YOU SHOW YOUR STRENGTHS

You will be part of our 30-strong development team and help shape our software and database projects.

- Modeling and implementation of business logic in distributed multi-production systems
- Operation, support and further development of 18 parallel production sites located throughout Europe (increasing)
- Development in several programming languages
- Database-driven work including maintenance of a data warehouse
- Coordination and management of external partners

WHAT YOU SHOULD BRING WITH YOU

- Degree in computer science or a very good completed apprenticeship as an IT specialist (application development) or comparable skills
- Skills in some of these areas: relational databases (Oracle DB , ...), SQL, application development in Java (Spring Boot) , PL/SQL , Oracle Forms, JavaScript (Angular), ...; software architecture concepts such as microservices, REST, Domain Driven Design ...; testing / quality assurance; operating systems Windows, Unix/Linux (commands, shell)
- Interest in new technologies and personal progress
- Good command of written and spoken English

YOUR PLUS - IN A JOINT TEAM

- + Versatile work with competent and sympathetic colleagues in the sense of the Agile Manifesto
- + Great potential for new innovative ideas and initiative
- + Proven and new technologies with innovative concepts and modern working methods (Scrum/Kanban, TDD)
- + Regular training opportunities
- + Good earning opportunities as an in-house IT employee
- + Family-friendly work

We look forward to receiving your application!
