

## New laboratory, state-of-the-art equipment, high sample capacity and excellent customer service

The special laboratory in Barendrecht for fats, oils and spices leaves nothing to be desired.

Dr. Verwey is synonymous with the field of feed and food analysis. The laboratory is known as an expert in quality control, especially for the processing chains of oil, fat and spices. The investigations range from standard quality parameters to undesirable residues.

### ALWAYS THE FINGER ON THE PULSE OF TIME

In spring 2022, AGROLAB Dr. Verwey moved to Barendrecht after 120 years in Rotterdam. The approximately 4,500 m<sup>2</sup> food and feed laboratory is equipped with the most modern laboratory analytical instruments and uses the latest testing methods. At the new location there is enough space for further innovations and expansion. The efficiently designed production flow improves the previous fast throughput times of a sample and increases the quantity for urgent samples.

### AGROLAB DR. VERWEY IS CLOSE TO ITS CUSTOMERS

Dr. Verwey is close to the market and its customers through its regional sales staff and membership in various associations. The exchange with experts in FOSFA, GAFTA, NOFOTA, GMP and others enables proximity to the market and ensures immediate participation in any strategic or relevant changes. In this way, the Dutch specialised laboratory is always informed about new trends and can adapt its services directly to the needs of its customers.

### AGROLAB DR. VERWEY IS PART OF THE AGROLAB GROUP

Since 2011, Dr. Verwey has been part of the AGROLAB GROUP. The advantage of the partnership is the strong networking with contract laboratories throughout Europe. The redundancy of the equipment and the even larger common parameter portfolio guarantee reliability and a comprehensive service for customers.

### NEWS FROM THE FOOD SECTOR

Stay informed about current topics. Starting next month, you will automatically receive all important information from the food sector once a month.

### ANALYTICS AT A GLANCE:

#### Quality Management - from the field to the trough and onto the plate

- Value-determining ingredients of agricultural raw materials e.g. oil content, moisture, external components.
- Classic fat indicators, processing and stability indicators; Verification of conformity with regard to specification parameters and international trade standards.
- Characteristic fat constituents for quality and authenticity assessment e.g. free fatty acids, fatty acid spectrum, sterol pattern
- Unwanted process and environmental contaminants e.g. mineral oil hydrocarbons (MOSH/MOAH), 3-MCPD/glycidyl esters, dioxins/PCBs, PAHs, mycotoxins, pesticide, solvent and plasticizer residues (e.g. phthalates); heavy metals
- Microbiological safety and sensory properties
